ADMINISTRATION REPORT

OF THE

Siddha Research Lab, Coimbatore

for the year 1963 – 64.

Administration Report of the Siddha Research Lab, Coimbatore for the year 1963—1964.

This Research Lab is named "The Siddha Research Lab", situated in the "Conti Buildings", Avanashi Road, Coimbatore. This is being maintained and managed by the Industrial Labour Welfare Association Ltd. of which Sri G. D. Naidu is the President. This Institute has got its own background as detailed in my previous report for the year 1962—1963.

The Research Lab was incharge of late Dr. B. P. B. Naidu, M. D. (Edin) M. Hy., D. P. H., D. T. M., (L'pool) for over ten years and he was able to bring out "Dia-Dietetic Food" for Diabetes Mellitus, "Leuco-Dietetic Food" for Leucorrhoea, Asthma Pills and certain Asavam for Bronchial Asthma besides certain oil preparations for external application in joint affections. All these research medicines were prepared out of Indigenous medicines alone. After the demise of Dr. B. P. B. Naidu, the Research Lab was kept closed for about a year for want of suitable personnel to take charge of the Lab.

Present Set-up

The undersigned Dr. M. Shanmugavelu, L. I. M., H. P. I. M., took charge of this Siddha Research Lab on 1st April, 1961. Details of my qualifications, experience and other particulars had been mentioned in my previous report. The Siddha Research Lab is situated in a very good centre of the town in a suitable building in Avanashi Road since 1st April, 1961. There is a proposal to shift this Research Lab to Podanur where Sri G. D. Naidu, President of the I. L. W. A. Ltd., has provided suitable buildings for running the Research Lab combined with out-patient dispensary. There is also provision for the quarters of the staff and in-patient wards for a few patients. In a few months it is likely to be shifted there. For consultation on Modern scientific medical line including operations Dr. C. R. Subramaniam, B. SC., M. B. B. S., F. R. C. S., F. R. F. P. S. (England) who is a clever and capable surgeon is also given a wing in the present building and attends the institute both morning and evening.

Pharmacy

The laboratory has got its own pharmacy attached to it within the premises. Almost all Indigenous compound medicines are being manufactured in this pharmacy with due care and interest in a

scientific and research manner. Raw drugs and herbs etc. are secured from bazaar, forest and other sources, purified wherever necessary and research simple and compound medicines are prepared. Most of the herbs are collected from Podanur and Pattimedu lands. Besides the Research Medical Officer there are one supervisor and four assistants to supervise the pharmacy work, dispense medicines to the out-patients and to attend to the clerical work. Apart from these members of the staff there are some labourers to collect herbs and to do actual pharmacy manual work. Compound medicines are being prepared here and issued to the out-patients and for Research cases.

Out-patient Section

The lab has got an out-patient section working between 8 A. M. and 12 noon daily except on Sundays. A good number of patients are being attended to daily and they are supplied with our Research and other medicines free of all charges.

Number of Patients Treated

During the year 1963–64 the out-patient section has treated 16,252 patients as against 18,618 during 1962–63 and 11,800 patients during 1961–62. A daily average of 211.26 patients during the year under report have

attended the institute as against 231.76 during 1962-63 and 165.37 during 1961-62. The fall in the total number treated during the year under report as compared with that of last year was probably because there had been no out-patients work on Sundays and holidays during 1963-64. However there is really a good appreciation of the services rendered here among the public.

Staff of the Research Lab

As already stated in addition to the Research Officer, there is a qualified Retired pharmacist as supervisor and four girl assistants to supervise the pharmacy work and assist the Research Officer in dispensing medicines to the out-patients and in maintaining statistics and other records. The girl employees are being trained systematically in the elementary knowledge of fundamental principles of medicine, Materia Medica, Pathology and medicine proper including Human body, the secrets of Indigenous medicine, pharmacy preparations and dispensing of medicines as an art.

Research Cases

Diabetes mellitus, Leucorrhoea, Bronchial Asthma, Leprosy, Cancer, Worst skin diseases like psoriasis, weeping and dry eczema or other Allergic Dermatitis,

Eusinophilia, Nephritis, Hypertension without Heart diseases, Leucoderma, Whooping cough, peptic ulcer, infective Hepatitis, Hypertrophy of the Tonsils and Influenza etc. are the cases we have taken up for research and we are striving hard to find out something new quicker remedies to achieve substantial cure. In our enterprise we infer that we are proceeding on right lines deriving encouraging results in our preparations. We have been preparing about 400 selected special Siddha medicines so far, for treating both Research cases and general diseases. For want of inpatient wards for Research cases and for want of facilities for scientific analysis of medicines and for a thorough check up of patients on admission and again at the time of discharge it has not been possible to assess and maintain a correct record of the result we achieve from our day to day practice. However it is an undisputable fact that this Research Lab is growing widely popular on account of efficiency and usefulness of the treatment rendered here with our research medicines. The result of treatment on the whole is encouraging in all the ways.

Medicines

From 1—4—1961 to 31—3—64 (during these three years) we have been preparing

and using on patients about 400 compound medicines, most of them being prepared repeated times according to their demand and usefulness in our day to day practice. All these medicines have been prepared in the pharmacy attached to the Lab from out of raw materials of vegetable, mineral and animal kingdoms.

Medicines are prepared purely on a scientific and research aspects based on very ancient Siddha manuscripts and on the theoretical and practical experience of the undersigned for over 40 years. So much so in each and every preparation of Siddha research medicine, some peculiarity or other will be observed in respect of their selection of ingrediants, combination, mode of preparation and finish. Huge amount is being expended on medicines year after year during the last three years and the treatment to the patients is entirely free of cost. A separate list of medicines prepared and used during these three years is also attached to the report. The consumption of medicines is so great that a large number of medicines are prepared number of repeated times.

Finance.

Both the capital and recurring expenditure in running this Research Lab, and

medicinal farm at Podanur and Pattimedu are met by the Industrial Labour Welfare Association Ltd., Coimbatore. A sum of Rs. 25,000/- during 1961-1962 and a similar amount during 1962-63 are expected to have been expended. During the year under report the expenditure is expected to be more than the previous years about Rs. 35,000/- owing to the appointment of additional staff, purchase of equipments and rise in the price of raw drugs besides the preparation of certain special higher class of research medicines. Correct figure of the expenditure is available in the Head Office of the Industrial Labour Welfare Association Ltd., Coimbatore. A type writer, a weighing machine and a telephone are supplied this year.

Visitors.

Very distinguished visitors have often visited this Research Lab, and encouraging remarks about the working of the institute have been made in the visitors book. Some of whom are worth mentioning here:- Governor of Kerala H. E. Sri V. V. Giri, Sri C. A. Ramakrishnan, member, Board of Revenue, S. Thondaman, M. P. Ceylon, S. D. Misra, Dy. Minister, Govt. of India, Indra Prasad, Dy. Sales Manager, The Tata Iron & Steel's (P) Ltd., J. D. Veerasekaran, M. P., Pondaluoyer, Ceylon, and one

Europeon Economic Officer German Consulate, Madras.

Conclusion.

An experienced clinical Technician for the clinical Lab, to assist in the examination of the urine, blood and faeces etc. is badly needed. Another effort may be made by advertisement to secure the services of an experienced Technician.

Some arrangements for in-patiant accommodation may be necessary for deserving research cases particularly for Leprosy, Cancer, Peptic and Duodenal ulcers, Bronchial Asthma and Diabetes Mellitus so as to enable us to have a correct data of the results of our research medicines.

Some of the prepared medicines of which we are confident of a cure on certain ailments may be tried for an increased production and distribution to various charitable institutions for a fair trial on suitable cases under their care free of cost so that the real worth of our research medicines may be assessed. This procedure will help us to let us know where we are with our research medicines.

Diseases Treated

88 Classifications of diseases have been made for all kinds of diseases treated among 16,252 cases during 1963–1964 as against 18,618 cases during 1962–1963 and 11,800 cases treated during 1961–1962. A separate statement has been attached herewith showing the classification of diseases for three years. However very prominent diseases treated here in order of frequency are arranged below:-

Order of Frequency	Classification of Diseases	1963-64	1962-63	1961-62
1	Other Respiratory diseases	1860	2024	1537
2	Other Digestive diseases	1846	2046	1526
3	Other Skin diseases	1015	1085	893
4	Arthritis and Spondylitis	840	920	750
5	Bronchial Asthma (Research)	756	735	533
6	Pyrexia of Uncertain origin	656	956	735
7	Diseases of the nervous system	542	652	437
8	Disease of the intestines	504	624	266
9	Influenza (Research)	480	486	282
10	Gastro-enteritis and colitis	465	665	466
11	Dysentery Bacillary	465	420	210

Order of Frequency	Classification of Diseases	63-64	62-63	61-62
12	Gastritis and Duodenitis	464	564	364
13	Leucorrhoea (Research)	434	464	202
14	Diabetes Mellitus (Research)	363	386	279
15	Whooping cough ,,	385	350	77
16	Other Heart diseases (chest pain)	385	392	317
17	Infective Hepatitis (Jaundice) (Research)	380	440	53
18	Rheumatism, muscular and others	295	315	150
19	Worms Intestines	285	220	43
20	Scabies	245	365	236
21	Disease of the female generative system	220	240	162
22	Other urinary diseases	180	224	136
23	Inflamatory diseases of the eye	166	146	130
24	Allergic dermatitis (Research)	165	145	65
25	Teeth and gum diseases	163	256	67
26	Chronic rheumatism	162	192	131
27	Anaemia	162	186	85
28	Pulmonary Tuberculosis	158	160	96
29	Other ear diseases	148	198	48
30	Other circulatory diseases	146	320	114
31	Malaria	142	122	42

Order of Frequency	Classification of Diseases	63-64	62-63	61-62
32	Diseases of the male general system	39	189	71
33	Diseases of the nose	120	180	143
34	Chronic Bronchitis	104	94	29
35	All other general diseases	104	116	49
36	Diseases of the brain and menings	94	124	110
37	Otitis media (ear)	92	122	100
38	Hypertension without heart diseases	84	94	75
39	Nephritis chronic and others (Research)	84	106	37
40	Leucoderma (Research)	64	76	51
41	Leprosy (Research)	54	68	23
